

### THE COMPANY

Tesys is a young, new and innovative company, with solid foundations based on professional technicians with over 20 years experience in automatic test systems.

Tesys was founded in 2009, a difficult year for many businesses and full of uncertainties globally.

Facing this "challenge" and responding competitively to the electronic and electromechanical market requirements in Italy and abroad is what make Tesys a company with character.

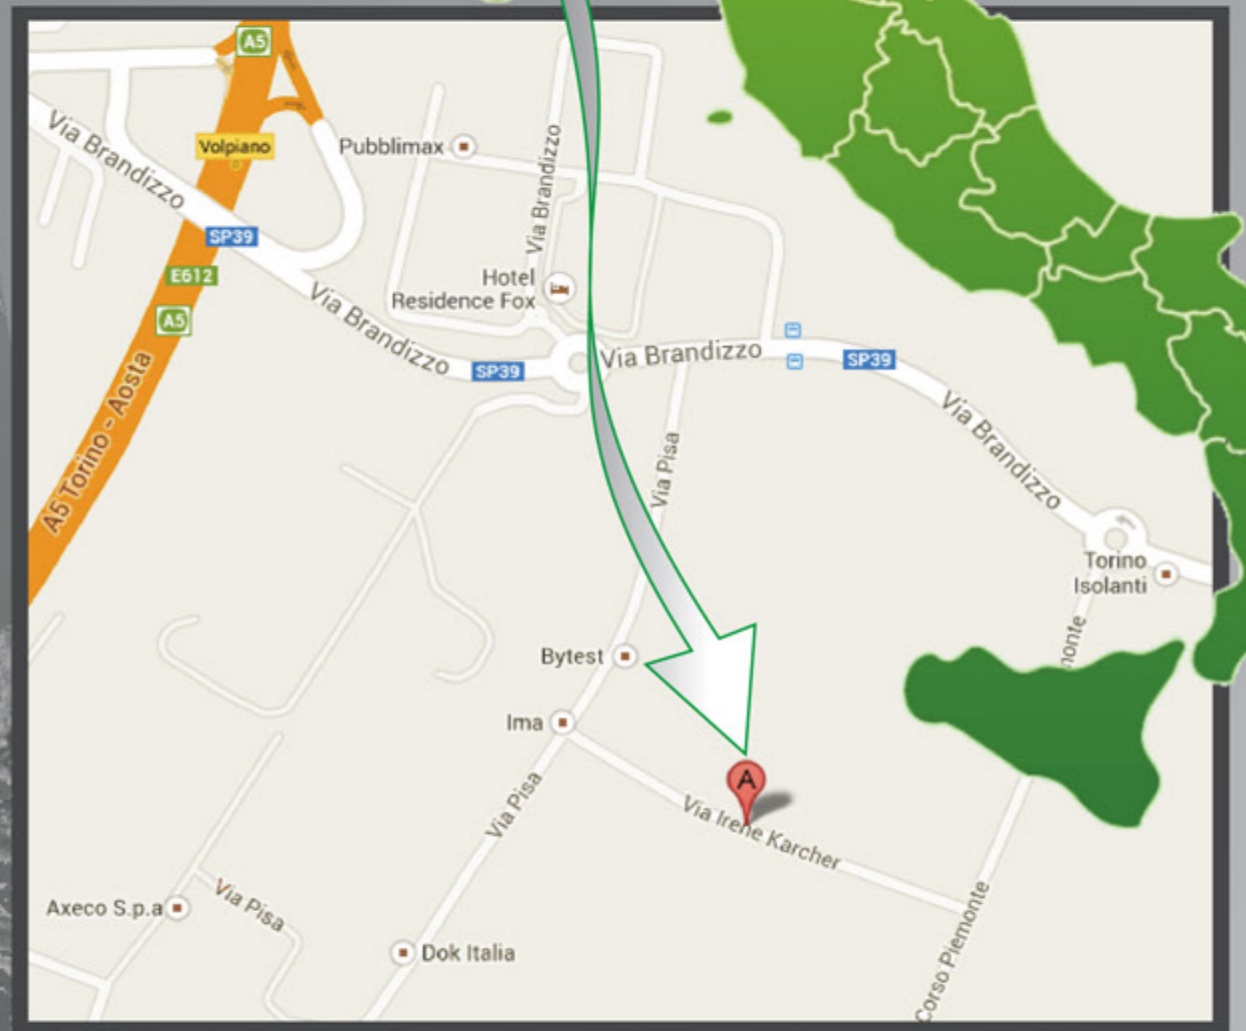

The three members of the management team share similar interests and considerable experience in the field of computerized testing systems. They are extremely motivated and united in achieving their objectives.

The team aims to offer the design (HW & SW) and the development of high quality, new products according to customer specifications.

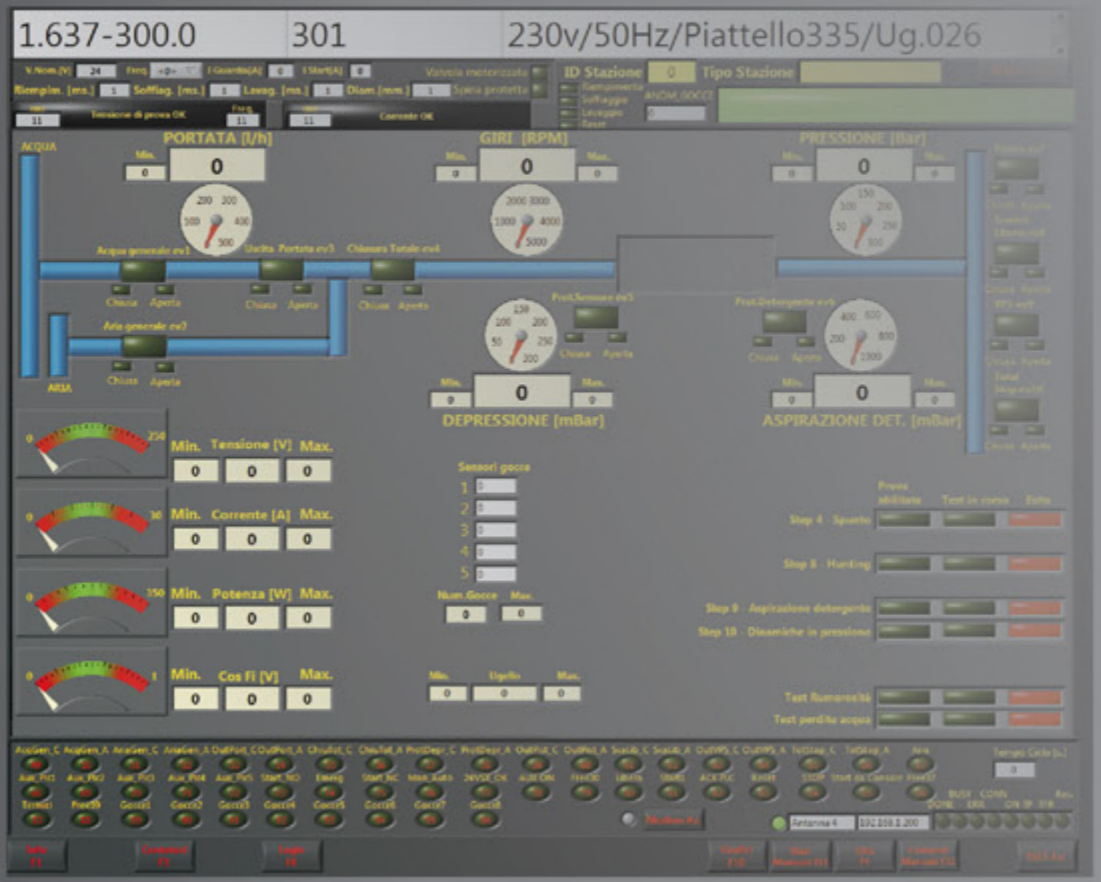

The guarantee of a solid partnership, based on constant reference to work schedules and progress reporting, after sales technical assistance completed by periodic servicing of instrument calibration and / or scheduled maintenance programs, make a Tesys a serious and reliable partner.

Tesys systems comply to all Italian, European and American regulations (CEI, ISO, UL).

## TS100 Overmoldings Test

## TS180 High Pressure Cleaner Test

## TS200

## Road Barrier Test

## TS200

## Whirlpool Tub Test

## TS30

## Rotors Test

## TS250 Gate Openers Test

## APPLICATIONS

### ELECTRIC SAFETY TESTS

- Dielectric Strength test
- Insulation Test
- Ground Efficiency Test
- Current leakage Test
- Surge Test

### FUNCTIONAL TESTS FOR DOMESTIC APPLIANCES

- Vacuum cleaners
- Floor cleaners
- Pressure cleaners
- Whirlpools and hot tubs

### FUNCTIONAL TESTS FOR OTHER APPLICATIONS

- Tubular motors for rolling shutters, shutters, blinds
- Rotary motors for swing gate openers
- Engines for overhead and sectional doors
- Electric AC, DC and brushless servo motors
- Stators and rotors
- Overmoldings
- Coils for dot matrix printer heads
- Coils for electromagnets and transformers

### CUSTOM SYSTEMS FOR QUALITY CONTROL

- Vibration detection
- Image detection
- Electric cable life tester
- Suction hose life tester
- Air flow rate and depression detector
- Water flow and pressure detector

### SERVICES

- Guaranteed technical assistance
- Ordinary and extraordinary maintenance
- Calibration services with "National Accreditation Body" certified instruments
- Electrical and electronic systems design
- Software development
